

Lab 2 Reflection: Agile Backlog & Sprint Simulation in Jira

Project: Multi-Vendor Artisan E-Commerce Marketplace (Problem Statement #31)

NAME: Diya R Gowda

SECTION: 5 'C'

SRN: PES1UG24CS159

1. Did your estimations reflect the actual effort?

Mostly, yeah. I was actually a bit worried about “Split cart payment across vendors” since I gave it 13 points, the highest in my whole backlog, and figured it would be the thing that blew up my timeline. Turns out that one and “Deduct platform commission” got done pretty early without much trouble. I think because it was the scariest-looking story, I actually thought it through more carefully when writing it, so the estimate ended up being close.

What actually slowed me down were stories I wasn't expecting which were Complete Checkout, Handle payout failure/retry, and Search for products by keyword. None of these were the biggest point values (5-8 each) but they took longer than I planned for. Checkout especially ended up needing more thought than I expected because it touches payment, shipping, and confirmation all at once. Lesson learned: it's not always the biggest story that bites you, sometimes it's the medium ones you don't spend as much time thinking through up front.

2. Was your backlog well-prioritized?

I think so. I put the vendor storefront setup, browsing/cart, and the payment split logic as High priority since those felt like the backbone of the whole app, and honestly if those don't work nothing else matters. Getting the payment splitting story done early because it was High priority ended up being a good call, it meant when the checkout/search/payout-retry stories took longer than expected, I still had room left in the sprint.

Lower priority stuff like View payout breakdown, Track order status, and Cancel an order ended up being the last things I finished, which honestly is fine since those aren't blocking anything critical for a first version.

3. How did your simulated sprint align with your plan?

It didn't go exactly how I originally mapped it out day by day, but the important part is everything got to done by the deadline, all 16 stories, all 4 Epics. At one point partway through I still had 21 points sitting in To Do and 11 In Progress, mostly the checkout/search/payout-retry stuff and a few smaller ones. So there was definitely a stretch where it felt like I was behind.

Because I'd already knocked out the biggest, scariest story early on, though, I had enough buffer to catch up on the smaller stuff without missing my Tuesday deadline.

4. What insights did the burndown chart give about your team's capacity?

The chart goes from 72 down to 0, but it's not a straight line, there's a flat stretch in the middle before it drops off fast near the end. That flat part lines up with when I was stuck on Checkout, Search, and the payout retry logic. The steep early drop is from finishing the big payment-split story quickly.

Basically what I took from this is that point size doesn't automatically equal how long something actually takes. A well-thought-out 13-point story moved faster than a few 5-8 point ones that had more small moving parts than I gave them credit for. Next time I'd probably spend a bit more time picking apart medium-sized stories before starting, instead of assuming the big scary-looking one is the only risky one.

One more note

This is based on my actual Sprint Report, List view, and Burndown Chart from Jira — 16 stories, 4 Epics, 72 points total, everything Done.

Sprint in progress

The image displays two screenshots of the Jira MVAECMP board, illustrating the progress of a sprint. The top screenshot shows the sprint in progress, with 16 work items (stories) and 4 epics. The bottom screenshot shows the sprint completed, with the backlog empty.

Sprint 1: 6 Sep – 8 Sep (16 work items)

Epics:

- Epic 1: Vendor Storefront & Catalog Management
- Epic 2: Shopper Ordering & Checkout Experience
- Epic 3: Split Payments & Vendor Payouts
- Epic 4: Order Fulfillment & Notifications

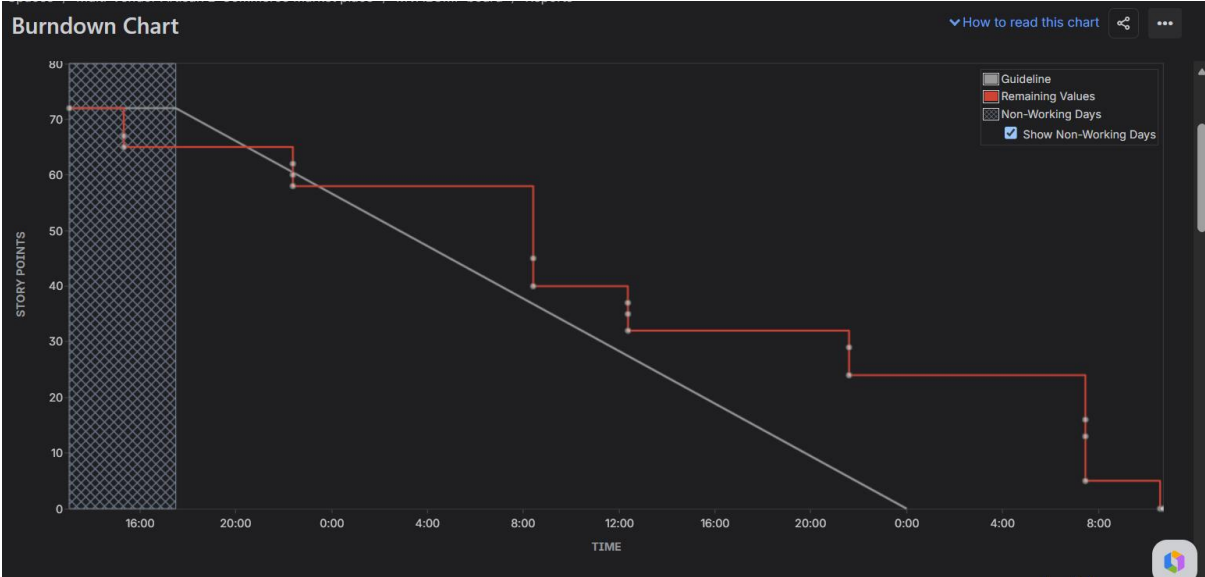

Stories:

- MVAECMP-11 Complete Checkout (8 points, Done)
- MVAECMP-14 View payout breakdown (3 points, In Progress)
- MVAECMP-6 Upload product photos (3 points, Done)
- MVAECMP-7 Create vendor storefront... (5 points, Done)
- MVAECMP-8 Edit product listing data... (2 points, Done)
- MVAECMP-16 Notify vendor of new ... (2 points, Done)
- MVAECMP-10 Add item to cart (2 points, Done)
- MVAECMP-9 Browse products by cat... (3 points, Done)
- MVAECMP-12 Split cart payment acr... (13 points, Done)
- MVAECMP-13 Deduct platform com... (5 points, Done)
- MVAECMP-15 Track order status (3 points, In Progress)
- MVAECMP-17 Notify shopper of ship... (2 points, Done)
- MVAECMP-18 Categorize produ... (3 points, Done)
- MVAECMP-19 Search for products b... (5 points, To Do)
- MVAECMP-20 Handle payout failure/... (8 points, To Do)
- MVAECMP-21 Cancel an order (5 points, In Progress)

Backlog (0 work items)

Your backlog is empty.
